+1 (208) 313-7334 | del20047@byui.edu | <https://www.linkedin.com/in/enmadelossa> | <https://github.com/EnmaSantos>

Technical Skills

- Languages & Data: Python, SQL, R, JavaScript, TypeScript, C#, Google Apps Script.
- Data Science & ML: Pandas, NumPy, scikit-learn, machine learning, statistical analysis, data cleaning, NLP.
- Frameworks & Libraries: ReactJS, FastAPI, Node.js, Express.js, .NET, Tailwind CSS.
- Databases: PostgreSQL, SQLite, SQL, MongoDB, database design.
- Tools & Analytics: Git, GitHub, GitHub Actions, dashboards, Trello, Nginx, Render, Fly.io, Canvas API.

Experience

Junior Software Developer - BYU-Idaho

January 2026 - Present

Brigham Young University - Idaho

Rexburg, Idaho

- Built Google Apps Script automations to collect and organize setup data for ~375 online courses per semester, generating Trello pipelines for 25 staff.
- Maintained Canvas LMS and Trello API abstraction layers, standardizing data integrations and reducing repetitive configuration code across internal tools.
- Developed a React.js/C# inventory app with admin roles, user balance tracking, GitHub Actions deployment, Nginx hosting, and senior-developer code review.
- Built a responsive Canvas API dashboard tracking enrollment and assignments for 250+ students across 1,000+ courses, turning LMS data into advisor-facing insights.

Volunteer Software Analyst

April 2024 - July 2024

Madison Fire Department

Rexburg, ID

- Contributed to an equipment inventory system tracking 200+ department assets, replacing spreadsheet-based processes with real-time monitoring and alerts.
- Designed SQLite database schemas and data structures focused on integrity, scalability, and reliable asset tracking.
- Reviewed SQL scripts and GitHub pull requests in an Agile team, helping maintain database standards, documentation, and clear technical communication.

Education

Software Engineering (B.S.), Minor in Data Science

September 2023 - December 2026

Brigham Young University - Idaho

Rexburg, Idaho

- Certificates: Full-Stack Web Development, Data Science.
- Relevant Coursework: Machine Learning, Database Design, Data Structures, Web Backend Development, Web Services, .NET Development, Computer Systems.

Projects

Vitality Vista

Rexburg, Idaho

Data-Driven Fitness & Nutrition Analytics App | React, PostgreSQL, APIs

May 2025 - Present

- Built a React/PostgreSQL app integrating nutrition and exercise APIs, structuring 500+ exercises and 1,000+ food entries for analysis and progress tracking.
- Created dashboards with TDEE calculations, workout metrics, JWT authentication, and CRUD workflows to translate health data into user-facing insights.

Kairo

Rexburg, Idaho

AI/NLP Voice Journal | Python/FastAPI, PostgreSQL, Whisper, BERT

September 2025 - December 2025

- Processed 1,000+ journal entries with Whisper transcription, BERT sentiment analysis, semantic search, and AI-powered Q&A for qualitative data insights.
- Implemented secure JWT/Google OAuth authentication, searchable notebooks, and NLP-based organization to help users identify patterns in daily journal data.
